I understand that the fire alarm system required for the above project is a single system for which the building owner is responsible, and it is required to meet the requirements of the 2021 International Fire Code, as amended, and NFPA 72 requirements for Central Station Service. As such, my bid specifications and contracts require the system to meet the requirements of Central Station Service and be certificated (UL) or placarded (FM) in accordance with the options identified in NFPA 72 for Central Station Service and third-party verification.

I have identified below, the Fire Alarm Company I will be hiring to provide Certification or Placarding of this building's fire alarm system.

I understand the following:

- The system installation permit will **NOT** be approved and issued unless an approved company has been identified above.
- The system installation will not be signed off nor an occupancy permit issued until the Fire Marshal or Fire Inspector verifies a certificate (or placard) is on site or receives a copy of an acceptable "request for certificate" receipted and numbered by the Underwriter's Laboratories (or Similar from Factory Mutual System)

DO NOT sign this form unless you understand what it requires. If you have questions, please contact the Rock Community Fire Protection District for this project
